ABCs for a Radiation Safety Culture

The fact is, when you know your exposure level you have a better chance of controlling it. One device that gives you this exposure insight is the RaySafe i3 personal dosimeter. RaySafe i3 provides you with constant, real-time radiation exposure information.

Proper training, keeping doses As Low As Reasonably Achievable (ALARA) and real-time personal dose feedback are all extremely effective ways to control and minimize harmful radiation effects.

RaySafe helps you avoid unnecessary radiation.
